## ASH GROVE CEMENT WEST, INC.

### Inter-Office Memorandum

Date October 30, 1984

To Erik Voldbaek

From Ken Rone

Copies to \_\_\_\_\_

Subject Activity Report

Week Ending 10/28/84

1. #2 Finish Mill down all week while convey line restriction is investigated. Line excavated and dismantled. No solution yet, will continue next week.
2. Type I clinker received for much needed replenishment of Type I inventories.
3. Auburn Terminal progressed all week. Rental of forklifts and compressors will add to cost. Twenty-four tons of cement brought down at this point with another 8 to 10 tons to go. Will finish early next week. Large silo is ready to receive cement.
- 10/28/84 4. Monsanto agreed to take back balance of VBLS. They also forwarded to us, forms which would legally assign the VBLS contract to Ash Grove. They are anxious to find processors who could consume VBLS. I feel \$85/ton processing fee (F.O.B. Seattle) is realistic.
5. Sampled hi-silica raw materials as a continuation of the raw material survey.
- 10/28/84 6. Office remodeling quoted at \$31,000. Aluminum window option will increase quote \$17,500.
- 10/28/84 7. Poured test section of Type I cement, in cooperation with Pioneer, to determine effects of high dosages of Mighty 150 and suspicions of fast take-up.
8. Held semi-monthly Safety Committee Meeting. No accidents to report. Visitors: yourself.
